

**3 years
SIP loss:**

₹2.5 Lakhs!

The Retail

Illusion Trap

Retail investors blindly believe **3-year SIP** automatically guarantees double-digit returns and absolute safety through rupee cost averaging.

The Hidden *Math Reality*

Evaluating performance strictly on a **3-year horizon** hides the severe impact of recent peak market valuations and expensive unit buying.

Why Compounding *Fails Retail*

Heavy SIP inflows during market highs create a **sequence-of-returns risk**, heavily dragging down your 36-month XIRR and wealth growth.

Institutional Mindset **Shift**

Institutions never panic over short-term drops. They strictly analyze **rolling returns** and overall market valuation cycles before making moves.

The Golden *Protective Rule*

Stop assessing SIP health using point-to-point XIRR under **5 years**. Always check benchmark P/E levels before pausing contributions.

Pre-Trade Action

Checklist

Review your mutual fund category performance across **1, 3, and 5 years** today. Are you ready to audit your portfolio?
